Illinois Farm Bureau
Southern Regional Groundwater Protection Committee
USEPA
Illinois Association of Groundwater Professionals
University of Illinois Office of Continuing Education
*Co-sponsors

ABOUT THE CONFERENCE
Most of Illinois is blessed with an abundant supply of ground and surface water to meet the needs of its citizens. Increasing demand from a growing population and economy, however, suggests that a reexamination of our State's water supplies and current and future water demands is necessary. This Conference will focus on water supply and demand issues facing Illinois in the upcoming decades. The major themes for the Conference are: projections for water supply and demand, water quality issues, legal and management issues, and socioeconomic concerns. Invited speakers at the Conference include state and national experts in the field of water resources planning. The Conference will be held in Chicago, Illinois at the Holiday Inn City Centre, just a block from Michigan Avenue's “magnificent mile”.

WHO SHOULD ATTEND?
This Conference is designed for all individuals interested in water resources planning and management for Illinois. The target audience includes municipal, county, and state government officials, consulting engineers, water utilities, regional planning commissions, and the public.
